

SUPPLEMENT ADVICE

With over 20 years of experience we are in a position to give expert advice on the use of oral nutrition. Much of this advice is based on experience. It is also supported by science and research.

Furthermore, we have tests that can be done to direct nutritional advice. We then offer testing to confirm the benefits of following the nutritional advice.

At Integrative Healthcare you can be confident in the supplements you are taking, as we are on the cutting edge of the latest research - seeking to offer the highest quality supplements at the best price.

We offer a complete line of oral supplements that we have personally reviewed for proper content, assimilation and dosage for maximum benefits.
