

MICRODERMABRASION

One of the many services that we offer our patients is microdermabrasion or micro-exfoliation with our crystal-free DiamondSkin device.

What is It?

The DiamondSkin is an effective treatment to improve the appearance of fine lines and wrinkles, brown spots, scars, and acne blemishes.

This technology utilizes natural diamond chips plated to a stainless steel surgical wand that effectively polishes away dead skin layers to expose healthier skin and promote new growth.

Resurfacing using a DiamondSkin is similar to particle microdermabrasion and chemical peels in its results, but without the adverse skin reactions. Unlike other exfoliation treatments, the DiamondSkin system uses no loose abrasives to contaminate you or the environment.

The FDA-approved DiamondSkin is setting a new standard for skin care. The procedure is fast, predictable, and painless...the PERFECT lunch hour peel.

Microdermabrasion is proven to clinically treat or improve:

- Dry or Patchy Skin
- Oily Skin
- Fine Lines and Wrinkles
- Sun Damaged Skin
- Hyper pigmentation
- Superficial Age Spots
- Acne Prone Skin and Acne Scars
- Blackheads & Whiteheads
- Post Laser Blending
- Certain Types of Stretch Marks
- Certain Types of Scar Tissue

Benefits of microdermabrasion:

- Non-Invasive
- Virtually Painless
- No Recovery Time
- No Hazardous Chemicals or Lasers
- Minimal Risk
- No Anesthesia Required
- Treats All Skin Types
